JM-PET/S2

PET Preforms Made Easy

160-560T

SINCE

We believe that superior PET preforms are born from superior technology.

Our JM-PET/S2 is a comprehensive system designed to deliver tangible benefits to your production floor. We've focused on the critical requirements of PET processing to ensure you achieve optimal results, every cycle.

FEATURING

Optimised Energy Management

Our specialised PET screw & eDrive™ (optional) enable efficient, rapid cycles. Maximise quality output, slash energy.

Specialised Screw for PET Materials

Dedicated PET screw means optimal melt and material integrity. Perfect for industries from Food to Cosmetics.

User-centric Design

Ultra-durable parts design. Easy setup, intuitive controls for smooth and continuous operation.

Enhanced Parts for Flexibility in Mold Choices

Dedicated ejector to allow the production of a wide range of complex molds.

Your Reliable Partner in Preforms

Powering diverse industries – beverage, food and cosmetics with precision PET preforms for versatile packaging applications.

Efficient, Stable and Energy-Saving

Injection Unit

Precise injection control for versatile, high-quality preform production, improving efficiency and lowering costs.

E-Drive™ OPTIONAL

Boosts production efficiency 10%-30% by enabling simultaneous plasticising with mold open/close and ejection.

Specialised Screw Design

25:1 specialised PET screw for optimal speed and melt quality.

For Cosmetics: Ensures flawless, uniform color for premium bottle appeal.
For Water/Oil Bottles: Boosts plasticising 20%+ for high-output, clear bottles.

High-Speed, Wear-Resistant Hydraulic Motor

High-throughput motor specially designed for durability and low-wear, ensuring extended life and consistent melt quality.

Stability, Precision and Convenience

Optimised Ejector

Greater ejection stroke/force allows efficient, versatile production with complex molds.

Large Water Manifold

Boosts cooling, reduces blockage, improves product stability.

T-Slots + Mounting Holes

Easy mold installation, improves reliability.

Precision at Your Fingertips

Fluid Touch-Screen

Effortless control with smooth touch-screen operation.

Industrial-Grade CPU

Operable in industrial environments from -20°C to 65°C.

F-RAM Technology

Auto-saves settings for seamless, uninterrupted performance.

Common Use Cases for JM-PET/S2

PET's inherent adaptability makes it a prime choice for an extensive range of packaging solutions, meeting diverse product protection and presentation needs.

JM-PET/S2 delivers critical features like precise material processing for the **Food and Beverage** industry (edible oil, drinks, mineral water, seasoning bottles), design flexibility for unique **Cosmetic** industry packaging (skincare bottles), and consistent quality essential for the demanding **Pharmaceutical and the Wellness industries** (pill bottles).

BOTTLES

COSMETICS

WIDE-MOUTH

SEASONING

Ensures food-grade quality. Consistent, safe packaging for your seasonings.

BEVERAGE

Delivers crystal-clear preforms. High output of flawless bottle preforms.

OIL

Delivers crystal-clear preforms. High output of flawless bottle preforms.

CLEAR

Optimal clarity perfect for aesthetic-driven industry's visual demands.

OPAQUE

Precise control and specialized screw achieve perfect opaqueness for light-sensitive cosmetics.

SNACKS

Wide-mouth for easy access. Optimal clarity perfect for transparency.

CLEAR PILL BOTTLE

Precision injection and optimized ejection achieve top clarity. Wide-mouth for easy access.

OPAQUE PILL BOTTLE

Precise control and specialized screw achieve perfect opaqueness for light-sensitive pills.

Intelligent Molding Solution

Get a one-stop injection molding solution from Chen Hsong integrating take-out robots, automatic loaders, dehumidifying dryers, conveyors, crushers, and mold temperature controllers for maximum efficiency, quality, flexibility, and data management.

The Heart of Efficient, Stable PET Preform Molding

“Your vision is our mission”
